Dear Sirs!
 We provide you with our own production catalog for the review and operation .
 The catalog is made of modern, wear-resistant materials and designed for extended use. Every year we will release updates to this catalog. You will be sent lists of no longer in production products for removal from the catalog and samples of new products with a new title page.
 We ask you to treat the catalog with care so that it will serve for many years.

Dear Sirs!

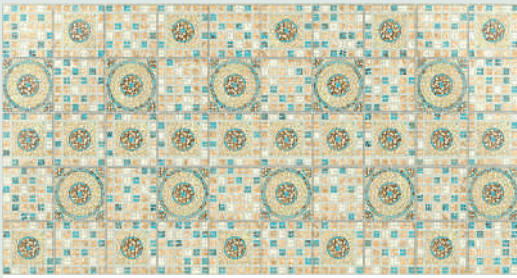

We provide you with our own production catalog for the review and operation .

The catalog is made of modern, wear-resistant materials and designed for extended use. Every year we will release updates to this catalog. You will be sent lists of no longer in production products for removal from the catalog and samples of new products with a new title page.

We ask you to treat the catalog with care so that it will serve for many years.

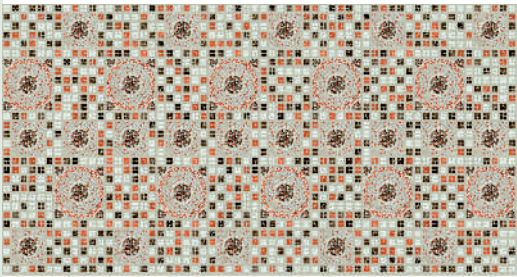

Mosaic «Fiesta». 2 types

Dear Sirs!

We provide you with our own production catalog for the review and operation .

The catalog is made of modern, wear-resistant materials and designed for extended use. Every year we will release updates to this catalog. You will be sent lists of no longer in production products for removal from the catalog and samples of new products with a new title page.

We ask you to treat the catalog with care so that it will serve for many years.

4620772253037 Old grey brick

-  Panel length: 971 mm
-  Panel width: 489 mm
-  Surface area: 0,4748 m²
-  In packing: 10 sheets

on request

4620772253631 Old yellow brick

-  Panel length: 971 mm
-  Panel width: 489 mm
-  Surface area: 0,4748 m²
-  In packing: 10 sheets

5. Scissors
6. Level, ruler.

WORK STAGES

1. Mounting panels:

The panels 0,3-0,4 mm do not require perfectly flat surfaces. Panels gently hide all the irregularities and defects in the walls;

Panels of 0,6 mm require a flat surface of the wall.

The walls must be cleaned of old layers, dirt and especially dust, since the glue does not hold well on the dusty surface. We recommend priming the wall before panels applying.

For high-quality gluing of panels, each sheet should be set according to the level (Fig. 2).

When installing panels that make imitation of brickwork, natural and decorative stones and shales - the first sheet from the beginning of the installation is cut with scissors in a straight line; the second row of sheets to align the pattern must be turned 180°.

2. The multipurpose edge is glued along the visible cut edges of the panels. If desired, it can be glued along the entire perimeter. (Figure 1a) - gluing the edge along the edges of the working area, (Figure 1b) - the design of the inner corner, (Figure 1c) - the design of the outer corner.

Edge is glued to the level.

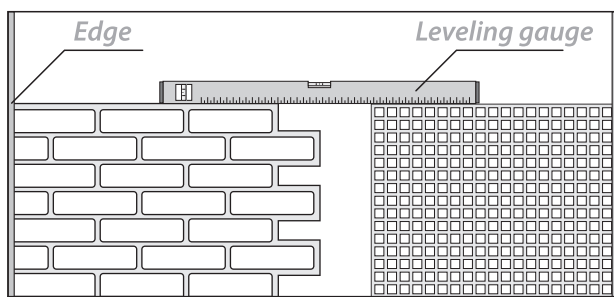

Figure 2

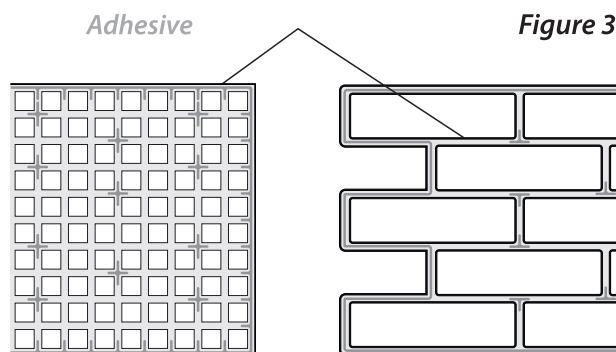

4. Glue is applied to the projecting parts from the inside of the sheet according to the proposed scheme on (Figure 3.) 3-4 minutes after application of the glue, the sheets are glued to the wall.

5. To simplify the work and prevent «slipping» of the sheets during mounting, we recommend fixing them with painter's tape to the wall.

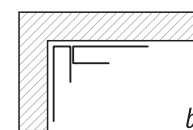

3. Mounting of the contacting sheets:

The gluing of panels 0,3-0,4mm is made «overlap», imposing the edge of one panel on the edge of the other;

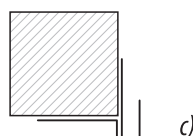

Panels of 0,6 mm are glued to the «toe to toe» carefully and accurately combining the side of one panel with the other.
